

Sanapur®

Recommended by physiotherapists.

For a familiar and firmer lying comfort

The SANAPUR **ECHO** mattresses provide a comfortably firmer lying comfort. The innovative material of the **ECHO** lying surface transforms the exerted body pressure into “positive counter-pressure”. The **ECHO** lying surface offers excellent permanently elastic properties, continuous regulation of moisture and warmth and has an antibacterial effect.

With its patented 3D surface finish, pressure points are noticeably reduced. The mattress construction below the **ECHO** lying surface provides the body with optimum support. Heavily strained and sensitive body parts such as shoulders and pelvis are offered optimal support thanks to the mattress’ patented SANAPUR PuraCell®-Soft shoulder zone and PuraCell®-Flex pelvic zone.

Comfort: medium-firm. (up to 130 Kg).
 Lying surface: PuraCell® Ultrafresh HR-foam.
 Continuous moisture and warmth regulation.
 Perfect balance between pressure relief and body support.
 Body conforming composition from head to toe with an active shoulder zone.

The cover

Removable, separable and washable at up to 60°C.
 Suitable for allergy sufferers!
