

Sanapur®

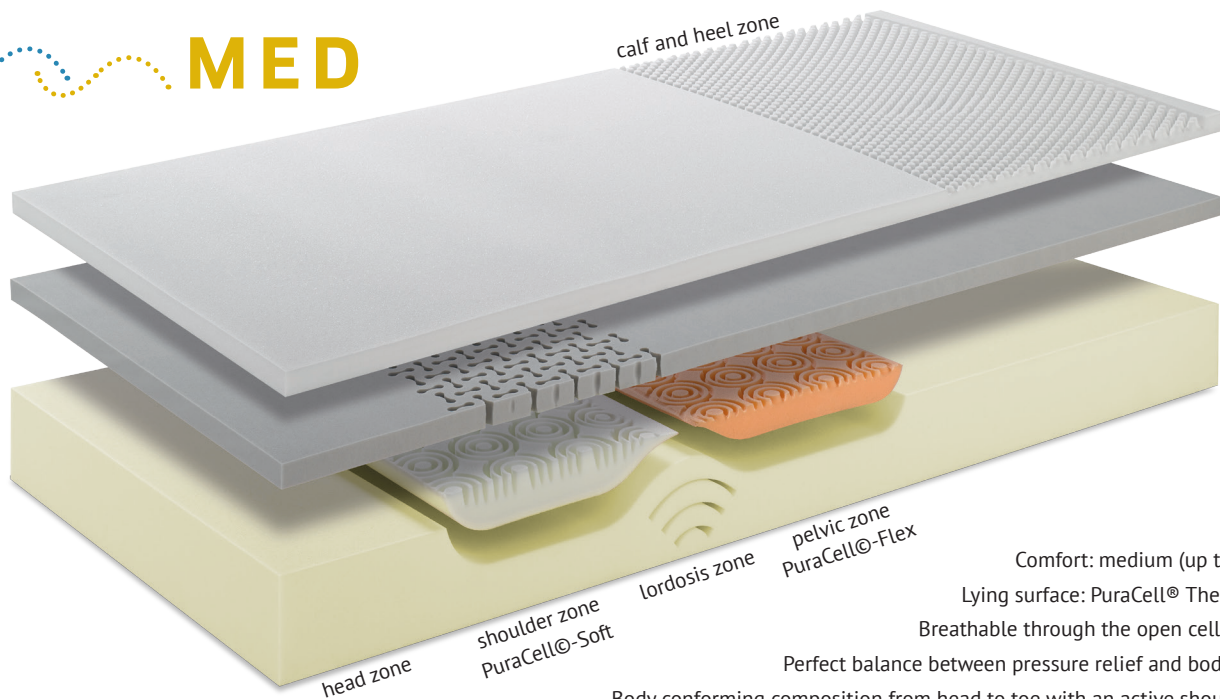

Recommended by physiotherapists.

For a relaxed and comfortable night's rest

The SANAPUR **MED** mattresses provide soothing pressure relief and comfortable body support. The velvety soft **MED** surface is breathable and reacts to body warmth and body pressure. It forms to the shape of the body, thereby offering a relaxed and comfortable rest. The mattress construction below the **MED** lying surface supports the body and promotes natural ergonomics.

Heavily strained and sensitive body parts such as shoulders and pelvis get comfortable and optimal support thanks to the innovative and patented SANAPUR PuraCell®-Soft shoulder zone and PuraCell®-Flex pelvic zone. The muscles can relax, circulation is stimulated, the spine and the joints are gently relieved and supported in their natural position.

MED

Comfort: medium (up to 110 Kg).
