

# Sanapur<sup>®</sup>

Recommended by physiotherapists.

The SANAPUR ORIGINAL pillowcase with BI-OME<sup>®</sup> finish:  
BI-OME<sup>®</sup> ensures efficient hygiene and a healthy sleeping environment

The new PuraCell<sup>®</sup> Cosy Soft cover is finished with the innovative BI-OME<sup>®</sup> finish.

#### Advantages

- Long-lasting freshness and suitable for allergy sufferers.
- It cannot be washed out and remains active throughout its entire service life.
- Eliminates all types of microorganisms (bacteria, algae, fungi). Eliminates the fungi from which the house dust mites feed and thus ensures an anti-allergic effect.
- Non-migrating and non-detrimental to humans and the environment
- ÖKOTEX Standard 100 Class 1 (baby class)

Mattresses and bedding are susceptible to microbial growth. This poses a risk to human health and can lead to allergic reactions. Insecticides or pesticides can kill microbial life forms easily on the one hand, but can also harm humans and the environment on the other. This is where BI-OME comes into play: a biological non-migrating, highly effective, non-toxic antimicrobial technology. The result is long-lasting freshness and significantly improved hygiene.

BI-OME successfully cleans harmful microorganisms from mattresses and bedding. Since no harmful substances are used, people and the environment remain unaffected. While conventional antimicrobial agents lose their effectiveness over time, BI-OME remains active throughout the life cycle of the treated products.
