

## Recommended by physiotherapists!

Physiotherapists recommend the SANAPUR Original pillow in order to maintain the therapeutic effect beyond the duration of treatment.

### The SANAPUR Original pillow will help you:

- :: Disorders of the cervical and upper thoracic spine,
- :: Muscular tension in the neck-shoulder area,
- :: Shoulder joint problems,
- :: Tension-related head aches, etc.

### Ergonomics Institute Munich (EIM)

Over the past decades, the renowned Ergonomics Institute Munich has developed into a globally recognized institution. The two SANAPUR original pillows CLIMA and MED have undergone a thorough scientific ergonomics and microclimate test. Both the SANAPUR Original pillow CLIMA and the SANAPUR Original pillow MED convince with top marks.

## Innovative functionality...

### So the original pillow helps you:

1. The funnel-shaped depression in the middle of the pillow stabilizes and supports the head in the natural axis of the spine.
2. The lateral recesses allow comfortable shoulder positioning in the lateral position. In the supine position, the trapezius muscle can relax optimally.
3. The hole in the middle prevents the closure of the auditory canal in the lateral position (no overpressure).
4. The neck recesses allow a gentle positioning of the neck and ensure perfect blood circulation to the head.
5. The innovative 3D surface structure provides efficient pressure relief for the neck muscles and vertebrae. The 3D surface structure also ensures that excess moisture and warmth are constantly dissipated.

## ...for a healthy sleeping position.

6. **NEW** By means of the two lower insert plates, FOUR different heights can be individually adjusted. The correct pillow height depends on the width of your shoulder and the depth of depression of your mattress in the shoulder area. The fourfold adjustment enables you to adjust the correct height..

Please note the numerous customer experiences: [www.sanapur.de](http://www.sanapur.de)

The two lower insert plates (27 mm and 18 mm thick) are made of PuraCell® Hydro Soft foam. This special material offers constant height stability and an efficient moisture regulation for a healthy sleep climate. However, the material is more durable than the Talalay latex of the CLIMA pillow or the viscoelastic foam of the MED pillow. This simplifies changing the plates and removing and fitting the cover.

## The fluffy Cosy Soft cover!

The Puracell® Cosy Soft fabric is a novelty in the cushion area. The fluffy soft cover is skin-friendly and extremely breathable.

- Lyocell Micro-TENCEL® with eucalyptus content
- Ökotex Standard 100 class 1 (baby class)
- Anti-pilling finishing (reduces pilling)
- Washable up to 60°C and suitable for allergy sufferers.

BI-OME is a revolutionary new technology for the permanent elimination of pests such as fungi, algae and bacteria. It is 100% biological and completely harmless to humans and the environment. You maintain your bed as a healthy living space.

that suits you best.*

**CLIMA** - The naturally soft Talalay latex of the original CLIMA pillow has an efficient moisture and heat regulation. Its soft and permanently elastic properties offer a balance between pressure relief and support function.

**Recommended if:**

- You tend to sweat more.
- You prefer constant height stability.

**MED** - The innovative viscoelastic show fabric of the original MED pillow offers optimal pressure relief and is breathable. It is also characterized by its reduced temperature sensitivity; it does not become "hard" even at low temperatures (>10°C).

**Recommended if:**

- You are very sensitive and pressure sensitive.
- A gentle, smoothing relief of pressure is a priority.

## The Sanapur Guide

The pillow is recommended for back and side sleepers:

1. Adjust the pillow to your height
2. Place your head centrally in the funnel
3. Relax your shoulders consciously

In the lateral position, the shoulder section glides into a comfortable position thanks to the indentation.

In the supine position, the head is gently supported, allowing the cervical vertebrae's to relax.
