100% Puracell®  
Talalay Latex

100% Puracell®  
Thermo (PUR)

**CLIMA** - The soft latex has perfect moisture and heat regulation (recommended for people who sweat a lot). Its permanent elastic properties guarantee a balance between pressure relief and support function (constant height stability).

**MED** - Viscoelastic foam of the latest generation with reduced temperature sensitivity. It offers optimum pressure relief and is breathable.

**COTTON** - Skin-friendly cover quickly releases moisture and is washable up to 60°C.

- ÖKOTEX Standard 100 - Class 1 (baby class).
- Suitable for allergy sufferers.

### *The pillow that adapts to your personal needs.*

The innovative design and the special materials favour an even distribution of pressure in the sensitive head, neck and shoulder areas. This promotes the beneficial relaxation of the whole body and lets you start the day relaxed in the morning.

1. Due to the ergonomic neck recess, the neck is always supported without pressure both in the supine position and in the lateral position. This promotes, among other things, muscle relaxation and better blood circulation to the head.

2. The two sides of the cover consist of a 3D spacer fabric. This ensures permanent moisture transport to the outside.
3. The innovative 3D surface structure provides an efficient pressure relief for the cervical muscles and cervical vertebrae's. The 3D surface structure also ensures a constant dissipation of moisture and excess heat in the head area.
4. Due to two insert sheets being part of the pillow, three different heights can be individually adjusted.

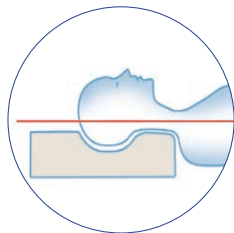

*\*You will receive a free travel bag with the Sanapur pillow!*

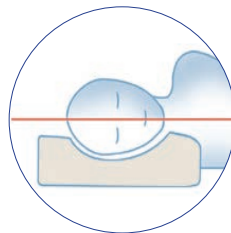

## *The Sanapur Guide*

The pillow is recommended for back and side sleepers:

1. Adjust the cushion to your height
2. Relax your shoulders consciously

Head and neck are ergonomically correct. Muscles and vertebrae can relax.

The head is gently supported and lies in the natural axis of the spine.
